

Technical cross-section diagram of a 100x100 cm bed base. The diagram shows a central circular hole (cső) surrounded by a sand-gravel layer (homokos-kavics ágyazat) with $Tr_{\gamma} = 85\%$. Above this is a layer of compacted soil (rétegesen tömörített talaj) with $Tr_{\gamma} = 90\%$ under the mat and $Tr_{\gamma} = 95\%$ under the frame. The top layer is for the frame adjustment (Burkolat helyreállítása). Dimensions on the left indicate a total height of 15 cm, with 10 cm for the mat and 30-60 cm for the base layer. A 10 cm dimension is also shown at the bottom left.
